

**CL120 Switched Dusk-to-Dawn Auxiliary Power**

The Series CL120 Auxiliary Power Adapter works with any fixture that utilizes a photocontrol and twist-lock type receptacle. The CL120 turns the luminaire and the auxiliary power on at dusk and off at dawn.

**FP285A Timed & Switched Dusk to Dawn Auxiliary Power Adapters**

The Series FP285A Auxiliary Power Adapter works with any luminaire that utilizes a photocontrol and twist-lock type receptacle. The FP285A turns the luminaire and the auxiliary power on at dusk. It then turns the auxiliary power off at midnight and turns the luminaire off at dawn. The FP285A provides a convenient weatherproof outlet with cover.

**Ordering Information**

Model	Line Voltage	Load
FP285A	105-130	1800VA
Note: Output voltage not grounded		

**Pass Through Spacer for Decorative Fixtures**

When you need to add height to your photocontrol, the FPS284 Spacer is ideal for raising the bar. This spacer will add around 2.5" and is available in both a 3-pin and 7-pin version
